Scientific Working Group on Digital Evidence

SWGDE Core Competencies for Forensic Audio

Disclaimer:
As a condition to the use of this document and the information contained therein, the SWGDE requests notification by e-mail before or contemporaneous to the introduction of this document, or any portion thereof, as a marked exhibit offered for or moved into evidence in any judicial, administrative, legislative or adjudicatory hearing or other proceeding (including discovery proceedings) in the United States or any Foreign country. Such notification shall include: 1) The formal name of the proceeding, including docket number or similar identifier; 2) the name and location of the body conducting the hearing or proceeding; 3) subsequent to the use of this document in a formal proceeding please notify SWGDE as to its use and outcome; 4) the name, mailing address (if available) and contact information of the party offering or moving the document into evidence. Notifications should be sent to secretary@swgde.org.

It is the reader's responsibility to ensure they have the most current version of this document. It is recommended that previous versions be archived.

Redistribution Policy:
SWGDE grants permission for redistribution and use of all publicly posted documents created by SWGDE, provided that the following conditions are met:

1. Redistribution of documents or parts of documents must retain the SWGDE cover page containing the disclaimer.
2. Neither the name of SWGDE nor the names of contributors may be used to endorse or promote products derived from its documents.
3. Any reference or quote from a SWGDE document must include the version number (or create date) of the document and mention if the document is in a draft status.

Requests for Modification:
SWGDE encourages stakeholder participation in the preparation of documents. Suggestions for modifications are welcome and must be forwarded to the Secretary in writing at secretary@swgde.org. The following information is required as a part of the response:

a) Submitter's name
b) Affiliation (agency/organization)
c) Address
d) Telephone number and email address
e) Document title and version number
f) Change from (note document section number)
g) Change to (provide suggested text where appropriate; comments not including suggested text will not be considered)
h) Basis for change

Intellectual Property:
Unauthorized use of the SWGDE logo or documents without written permission from SWGDE is a violation of our intellectual property rights.

Individuals may not misstate and/or over represent duties and responsibilities of SWGDE work. This includes claiming oneself as a contributing member without actively participating in SWGDE meetings; claiming oneself as an officer of SWGDE without serving as such; claiming sole authorship of a document; use the SWGDE logo on any material and/or curriculum vitae.

Any mention of specific products within SWGDE documents is for informational purposes only; it does not imply a recommendation or endorsement by SWGDE.

SWGDE Core Competencies for Forensic Audio

Table of Contents

1. Purpose

This document provides an outline of the knowledge and abilities practitioners of forensic audio should possess. The following elements provide a basis for training and testing programs. This basis is suitable for certification, competency, and proficiency testing.

2. Scope

These competencies are sufficient for a technician performing basic forensic audio functions such as equipment configuration, handling of evidence, format conversion, basic media repairs, and reporting of results as outlined in *SWGDE Best Practices for Forensic Audio*.

In a given organization, the role of a technician might include some or all of the functions detailed below. A technician must possess the knowledge and abilities for the tasks performed.

Other procedures, such as enhancement, complex media repairs, or signal analysis require additional skill sets specific to the content or phenomena under test. Refer to *SWGDE/SWGIT Guidelines & Recommendations for Training in Digital & Multimedia Evidence* for general training requirements of forensic practitioners.

3. Core Competencies

A forensic audio technician must be able to hear and must track their acuity regularly. A hearing assessment must also be performed after trauma that results in hearing loss.

A forensic audio technician must understand audio technology and forensic methodologies, and must remain current in the discipline through such means as scientific and legal literature, classes, professional organizations, and other continuing education.

A forensic audio technician must be trained on their laboratory's specific standard operating procedures which should be based on best practices, such as *SWGDE Best Practices for Forensic Audio*.

A forensic audio technician must have an understanding of ethics and the requirements for integrity and neutrality in scientific processes.

A forensic audio technician must have the ability to apply the principles of quality management such as those defined in *SWGDE Minimum Requirements for Quality Assurance in the Processing of Digital and Multimedia Evidence*.

3.1 Audio Laboratory Configuration

3.1.1 Knowledge of computer workstation hardware, configuration, software and connection of peripheral storage devices.

3.1.2 Ability to operate task specific forensic audio processing equipment and software and know their capabilities and limitations.

3.1.3 Ability to run test signals through individual devices and through an interconnected laboratory system to verify connectivity and performance is as expected.

3.1.4 Ability to test audio processing software using known audio data to verify it is performing as expected.

3.1.5 Ability to identify equipment that requires calibration, identify when that equipment is out of calibration, and what steps must be taken to re-calibrate.

3.1.6 Ability to maintain equipment and perform basic maintenance functions including cleaning and demagnetizing electronic heads, defragmenting hard drives, and updating operating system, forensic, and antivirus software.

3.1.7 Ability to identify and mitigate environmental noise that interferes with hearing evidence recordings within the laboratory (speech, HVAC, equipment fans, vibration).

3.1.8 Ability to identify and mitigate sources of electromagnetic interference (EMI) such as AC, ground loops, stray electrical and magnetic fields, RF equipment (e.g., cell phones, radios, etc.), and CRTs.

3.1.9 Knowledge of the proper temperature, humidity, and ventilation requirements of audio equipment.

3.1.10 Knowledge of various cable and connector types and the impact of their construction and distance on signal quality, impedance, and interconnection issues.

3.1.11 Knowledge of the decibel scale and its variants, e.g., dBFS, dBV, dB SPL.

3.1.12 Ability to design analog signal paths to mitigate noise and distortion and to keep signal levels within an appropriate range.

3.1.13 Knowledge of signal formats and their limitations and the ability to choose signal formats to optimize signal quality.

3.2 Advising the Submitter

3.2.1 Ability to advise submitters regarding best practices for identifying and seizing audio evidence for subsequent laboratory examination, evidence preservation, packaging, transport, and storage.

3.3 Evidence Retrieval

3.3.1 Ability to identify physical media of the source and determine the appropriate playback equipment.

3.3.2 Ability to research unfamiliar audio recording devices and systems to best collect audio and associated data.

3.4 Submission of Request

3.4.1 Ability to determine whether a request is within the scope of an individual's or the laboratory's services.

3.4.2 Ability to assess the risks to audio evidence posed by processes from other forensic science disciplines.

3.4.3 Ability to assess the risks to non-audio evidence posed by forensic audio processes.

3.4.4 Ability to determine an appropriate sequence of interdisciplinary forensic analyses, given the risks that exist.

3.5 Audio Evidence Handling

3.5.1 Knowledge of physical media formats and how to protect them from overwrite and environmental damage.

3.5.2 Ability to identify physical damage which may impact the proper function of the media or device.

3.5.3 Ability to safeguard recorded evidence (write protection and physical, magnetic, and environmental protection).

3.5.4 Ability to properly pack, seal, and ship media exhibits without damaging the physical media or the recorded evidence.

3.5.5 Ability to properly label media exhibits for identification without damaging evidence.

3.5.6 Knowledge of how duplication processes can have adverse effects on signal quality and intelligibility.

3.5.7 Ability to explain the limitations of duplicated recordings and the importance of original recordings.

3.6 Preliminary Examination

3.6.1 Ability to perform spectral analysis and knowledge of its application and limitations.

3.6.2 Ability to perform amplitude analysis to identify signal characteristics such as DC offset, clipping, and dynamic range.

3.6.3 Ability to perform critical listening to identify signals and events of interest and the suitability for analysis.

3.6.4 Ability to estimate signal bandwidth.

3.6.5 Ability to estimate number of independent channels and channel phase difference.

3.6.6 Ability to evaluate the dynamic range of a signal.

3.6.7 Ability to select an appropriate output format with sufficient channels, sampling rate, and bit depth to represent the desired signal to the desired accuracy.

3.6.8 Ability to adjust the playback gain, amplification, and capture devices to minimize distortion and prevent clipping while preventing the loss of low energy signals.

3.6.9 Knowledge of widely supported audio formats.

3.6.10 Ability to check digital media for viruses.

3.6.11 Ability to evaluate a digital source signal to determine the native bit depth, sampling rate, dynamic range, encoding scheme, and number of channels.

3.6.12 Ability to identify audio file formats and determine the appropriate software to access, play back, or convert audio data.

3.6.13 Ability to recover and interpret metadata from file formats.

3.6.14 Ability to attach, configure, and use write protection hardware and software to ensure original data integrity.

3.6.15 Knowledge of hashing processes and the ability to compute and verify them.

3.7 Analog Playback

3.7.1 Ability to determine a recording's track configuration and speed and select an appropriate playback device.

3.7.2 Ability to adjust playback equipment to produce an optimal output signal.

3.7.3 Ability to use the frequency response and channel separation of the audio signal to adjust playback head height and azimuth to optimize the output signal bandwidth, track separation, and level.

3.8 Repair and Recovery

3.8.1 Knowledge of the production and assembly of audio media, the materials from which they are made, the physical properties of those materials, and how the media are designed to function.

3.8.2 Ability to evaluate media damage to determine whether it may affect access, playback, or recovery of the recording.

3.8.3 Ability to disassemble and reassemble media housings and replace damaged components as necessary.

3.8.4 Ability to clean magnetic tape without damaging it.

3.8.5 Ability to clean optical discs without damaging them.

3.8.6 Ability to identify the following in magnetic tape reels: sticky-shed, binding, pack slip, torn or wrinkled tape, and damage to the tape reel.

3.8.7 Ability to determine if data has been written to a recordable optical disc.

3.8.8 Ability to splice magnetic tape.

3.9 Results

3.9.1 Ability to provide effective written and verbal communication.

3.9.2 Ability to communicate effectively the capabilities and limitations of processes and results.

3.9.3 Ability to assess the needs of the submitter to provide the appropriate output medium and format.

3.9.4 Ability to record examination notes that document how exhibits were handled and what processes were performed with enough detail to allow a comparably trained examiner to explain the results or derive similar conclusions.

3.9.5 Ability to write a report containing all of the relevant information in a clear and concise manner using standardized terminology, such as *ASTM E2916 Standard Terminology for Digital and Multimedia Evidence Examination*.

3.10 Legal – Courts, Testimony, Law

3.10.1 Knowledge of fundamental federal, state, and local case law pertaining to forensic audio and speech.

3.10.2 Knowledge of rules of evidence in civil and criminal procedure pertinent to admissibility and authentication.

3.10.3 Knowledge of rules of evidence in civil and criminal procedure pertinent to expert witness testimony.

3.10.4 Ability to successfully provide testimony in court under direct and cross examinations.

3.10.5 Ability to present technical data in a clear and concise manner.

SWGDE Core Competencies for Forensic Audio

History

Revision	Issue Date	Section	History
1.0 DRAFT	2010-05-20	All	Initial draft for public comment.
1.0 DRAFT	2010-09-16	All	Formatted and technical edit performed for release as a Draft for Public Comment.
Version 1	2011-09-15	All	Approved by SWGDE as release v.1.
			Updated document per current SWGDE Policy with new disclaimer. No changes to content and no version/publication date change. (9/27/2014)
2.02 DRAFT	2016-09-15	All	Updated document to synchronize with SWGDE Best Practices for Forensic Audio version 2.2. Approved by SWGDE as draft release v2.
2.03 DRAFT	2017-01-12	1 – 3	Updated to allow for differences in technician roles in different agencies. Approved by SWGDE to re-release as draft v2.
2.04 DRAFT	2017-02-21	Formatting	Formatted and published as a Draft for Public Comment.
2.05 DRAFT	2017-06-20	3.1, 3.6, 3.7, 3.10	Updated document in response to comments received. SWGDE voted to approve as an Approved document.
Version 2	2017-07-18	None	Formatted and published as Approved version 2.
